Duggan Veterinary Supplies Ltd.

Trusted Worldwide by Veterinarians, Trainers & Owners.

WHEN IS NEBULISATION USED?

Around the world, horses of all disciplines, breeds and ages are hindered by respiratory issues, allergies, airway irritation and inflammation. Nebulisation devices enable veterinary clinics, trainers and owners to help manage a wide range of both acute and chronic respiratory issues:

- **EQUINE ASTHMA**
- **INFECTIONS**
- **INFLAMMATION**
- **USE WITH CHELATED SILVER (EQUISILVER/SILVAPLEX) and IMMUNO SAN**
- **PLUS:** Condition lungs for horses in training, clear dirty noses, prepare for sales and better manage dry coughs and allergies.

WHY FLEXINEB® E3

Mask: Comfortable yet secure in multiple sizes and colors.

Controller: Features a simple single button for operation and is powered by a rechargeable battery with up to six hours of usage.

Clear Medication Cup: Converts liquid drugs into a very fine aerosol mist for direct delivery into the lungs.

New E3 Features

- 3-User Selectable Modes
- 35 minute turnoff; no need to restart when giving 30 mls
- Optimised performance with improved auto-tuning
- New Battery Management System
- Dry Med Cup detection
- Portability up to 6 hours
- New User Interface
- Update software via USB
